

Choosing a system

To choose the right system, you need to know the following:

INSTALLATION PLACE

OPENING SYSTEM

DOOR WEIGHT

To calculate the weight of the door, use the following values:

- 1m² laminated chipboard with thickness of 18mm weighs approx. 13kg, and
- 1m² glass with thickness of 1mm weighs approx. 2.6kg

DOOR THICKNESS

NUMBER OF DOOR LEAVES

All offered systems are summarized in the table below. Click a picture to go to the page describing the selected category/system.
